

## **National Institute for Health Research**

### NIHR: Clinical Research Network - Study Support Service

For any study that is eligible or applying for Network support, whether commercially or non-commercially sponsored, we offer a range of services across the research pathway. Our dedicated advisors are here to help in areas such as study feasibility, regulatory approvals, assistance with site identification, costings, set up and delivery to time and target.

Our infrastructure provides unparalleled access to, and understanding of, the NHS research environment. Regardless of the location, study type, study size or therapy area of the research, we will provide consistent and high quality support.

To find out more about the Study Support Service visit our website <https://www.crn.nihr.ac.uk/can-help/study-support-service/> and watch a video explaining more about the new service <https://www.crn.nihr.ac.uk/>
